

# HOW CLEAN IS YOUR OFFICE?

Millions of people all over the world work in close proximity to one another making the office a breeding ground for bacteria.

## YOUR FILTHY DESK!

### KEYBOARD

Scientists at the University of Arizona have found that your keyboard has more germs than a toilet seat! A weekly clean with an anti-bacterial wipe is essential.

### DESK

63% of workers regularly work through their lunch hour.

Dining 'At Desko' creates a hotspot for bacteria. Use hand sanitizer and disinfectant wipes frequently..

## HIDDEN GERM ZONES!

### DOOR HANDLES

Door handles are one of the most common harbourers for harmful bacteria, causing infections to spread - wash hands regularly and use a disinfectant spray

### DOOR FRAMES

Cold & Flue viruses can survive for up to 18 hours on hard surfaces. Door frames are a hidden germ zone.

## COMMUNAL AREAS!

### WATER COOLER

Mouths and water bottles come in contact with the water cooler spout and transfer germs and bacteria to the surface.

### WORKING SICK

Only 16% of workers use all of their paid sick leave.

People go to work sick, even when they shouldn't. Work from home and stop the spread of germs.
