Dear Valued Customer,

Bunzl Canada has always been committed to consistently seek operational efficiencies that will enable us to optimize service to our customers while offering the most competitive prices. One of the ways in which we achieve this is through our recent investment in industry leading routing software, Roadnet. This routing software allows us to couple delivery requirements with real-time analytics and advanced technology to generate delivery routes that have your products delivered to you the most efficient way possible. Also important to note, a more direct route path results in less kilometers, less emissions and a healthier planet. In fact, we forecast we will be able to reduce our emissions output by over 100,000 litres of fuel annually. This is equivalent to removing 68 cars off the road.

As we optimize our daily routes based on daily orders, the time in which your delivery is received may vary slightly. However, we will always remain dedicated to ensuring you receive your products for when you need them.

As always, we'd love to hear your feedback, especially as we continue to roll out our new routing program. Please contact your sales representative with any feedback you'd like to share on your delivery experience.

Sincerely,

The Bunzl Supply Chain Team
